Putnam Large Cap Growth Fund

Investing in companies benefiting from long-term growth themes

Durable growth

Seeks to identify companies exhibiting above-average growth and that can outperform in a variety of economic environments

Thematic approach

Combines top-down investment themes with fundamental research to identify companies we believe can benefit from growth trends

Rigorous portfolio construction

Builds a concentrated portfolio that seeks to maximize stock-specific risk and mitigate factor exposure

Top 10 holdings

Microsoft	12.55%
NVIDIA	8.89
Apple	8.18
Amazon	7.79
Alphabet	5.43
Meta Platforms	3.52
Broadcom	3.38
Eli Lilly	2.88
Mastercard	2.84
Visa	2.25

Holdings represent 57.71% of the portfolio and will vary over time.

Sector weightings

Sector	Underweight	Overweight	Portfolio	Benchmark
Real estate		1.0	1.8%	0.8%
Health care		0.8	11.4	10.6
Information technology		0.5	44.5	44.0
Materials		0.2	0.9	0.7
Industrials		0.2	6.0	5.8
Consumer discretionary		0.0	14.9	14.9
Utilities	-0.1		0.0	0.1
Communication services	-0.1		11.9	12.0
Energy	-0.5		0.0	0.5
Financials	-0.6		5.8	6.4
Consumer staples	-2.6		1.5	4.1

Cash and net other assets represent 1.4% of the portfolio.

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

The unclassified sector, where applicable, includes exchange-traded funds and other securities not able to be classified by sector.

Risk (Y shares, as of 3/31/24)

Beta	0.98
Tracking error	2.68%
Up capture ratio	97.53%
Down capture ratio	98.77%

Top active weights

Top 5 overweights	Portfolio	Benchmark	Over/under
Amazon	7.8%	6.2%	1.6%
Salesforce	2.2	0.8	1.4
Mastercard	2.8	1.5	1.3
Broadcom	3.4	2.2	1.2
Boston Scientific	1.1	0.0	1.1

Top 5 underweights	Portfolio	Benchmark	Over/under
Apple	8.2%	9.5%	-1.3%
AbbVie	0.0	1.2	-1.2
Alphabet	5.4	6.3	-0.9
Accenture	0.0	0.8	-0.8
Intuit	0.0	0.7	-0.7

Capture ratios are used to evaluate how well an investment manager performed relative to an index during specific periods (periods of positive return in the case of up capture, negative return in the case of down capture). The ratio is calculated by dividing the manager's returns by the returns of the index during the period and multiplying that factor by 100. **Turnover** is the rate at which the fund buys and sells securities each year. For example, if a fund's assets total \$100 million and the fund bought and sold \$100 million of securities that year, its portfolio turnover rate would be 100%. **Beta** is defined as a fund's sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, since inception analysis is used. **Tracking error** assesses how closely a fund's performance tracks that of the fund's benchmark by calculating the standard deviation of the difference between the fund's returns and its benchmark returns over a given time period, typically 5 years.

Not all share classes are available on all platforms.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class A and Y shares assumes reinvestment of distributions and does not account for taxes. After-sales-charge returns for class A reflect a maximum 5.75% load. Returns for class Y shares prior to their inception are derived from the historical performance of class A shares, which have not been adjusted for their lower expenses; had they, returns would have been higher. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com.

The Russell 1000[®] Growth Index is an unmanaged index of those companies in the large-cap Russell 1000 Index chosen for their growth orientation. Frank Russell Company is the source and owner of the trademarks, service marks, and copyrights related to the Russell Indexes. Russell[®] is a trademark of Frank Russell Company. You cannot invest directly in an index.

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

The Morningstar Rating[™] for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36–59 months of total returns, 60% 5-year rating/40% 3-year rating for 60–119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads. Putnam Large Cap Growth Fund received 4, 4, and 5 stars for the 3-, 5-, and 10-year periods among 1,111, 1,037, and 807 Large Growth funds, respectively. Morningstar rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Morningstar. Morningstar rankings may differ significantly from Morningstar's risk-adjusted star ratings. Past performance is not indicative of future results.

Consider these risks before investing: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. From time to time, the fund may invest a significant portion of its assets in companies in one or more related industries or sectors, which would make the fund more vulnerable to adverse developments affecting those industries or sectors.

The fund may invest a significant portion of its assets in companies in the information technology sector. The information technology sector may be significantly affected by technological obsolescence or innovation, short product cycles, falling prices and profits, competitive pressures, and general market conditions. The fund is considered non-diversified and can invest a greater portion of its assets in securities of individual issuers than can a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.
