Putnam Core Equity Fund has the flexibility to invest in all types of stocks

When investing in the stock market, it is impossible to predict which type of stock or style will lead the market from year to year. Investing across all styles and capitalization sizes may be the best way to capture gains with less volatility.

Putnam Core Equity Fund (PMYYX) can invest in both growth and value stocks and across all capitalization sizes, seeking opportunities even when market leadership changes.

The fund's managers are able to own companies throughout their entire growth cycle, without the capitalization restraints that might force them to sell holdings that get too large, or that would otherwise prevent them from taking advantage of certain attractively priced stocks.

FLEXIBILITY

The fund's portfolio managers can invest in companies of all sizes.

A BLEND STRATEGY

The fund can invest in both growth stocks and value stocks, seeking capital appreciation for investors.

A RIGOROUS PROCESS

Supported by a strong research team, the fund's managers use their stock-picking expertise and multiple resources to identify opportunities and manage risk.

Ask your advisor about the role Putnam Core Equity Fund can play in a diversified portfolio, or visit [putnam.com](https://www.putnam.com) for more information.

For informational purposes only. Not an investment recommendation.

Consider these risks before you invest: Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.

Diversification does not guarantee a profit or ensure against loss. It is possible to lose money in a diversified portfolio.

Investors should carefully consider the investment objectives, risks, charges, and expenses of a fund before investing. For a prospectus, or a summary prospectus if available, containing this and other information for any Putnam fund or product, call your financial representative or call Putnam at 1-800-225-1581. Please read the prospectus carefully before investing.
